

University of New Haven  
Bloodborne Pathogens Quiz

Name (Please print): \_\_\_\_\_

Signature: \_\_\_\_\_

1. The University of New Haven requires all students enrolled in classes or lab sections who could "reasonably anticipate" facing contact with blood and other potentially infectious materials be trained:
  - a. Prior to working with or around blood or other bodily fluids
  - b. At the beginning of each semester
  - c. When the Exposure Control Plan has been revised
  - d. All of the above
  
2. What information is included within the Emergency Control Plan?
  - a. Personal Protective Equipment
  - b. Engineering Controls
  - c. Hazard Communication
  - d. All of the above
  
3. "Good Samaritan" acts are considered to be occupational exposure under the Bloodborne Pathogens standard.
  - a. True
  - b. False
  
4. Contaminated equipment (i.e. fume hood, biosafety cabinet or lab bench) should be thoroughly disinfected with an appropriate cleaning solution. What is the appropriate cleaning solution?
  - a. 100% bleach
  - b. 1:1 dilution bleach and water
  - c. 1:10 dilution bleach and water
  - d. Just some soap and water
  
5. If you have blood or potentially infectious materials splashed in your eye, you should flush your eye with clean, running water for?
  - a. 2 minutes
  - b. 5 minutes
  - c. 10 minutes
  - d. 15 minutes
  
6. The CDC states that Hepatitis B can live in dried blood for up to a week.
  - a. True
  - b. False
  
7. Which of the following bodily fluids could contain bloodborne pathogens?
  - a. Semen
  - b. Vaginal secretions
  - c. Bloody saliva
  - d. All of the above

8. If you wear gloves while cleaning up a spill of potentially infectious material, it is not necessary to wash your hands after removing your gloves.
  - a. True
  - b. False
  
9. While washing your hands, for how long is it recommended you rub your hands together with soap while running under comfortably warm water?
  - a. 5 seconds
  - b. 15 seconds
  - c. 5 minutes
  - d. 10 minutes
  
10. Eating and drinking are permitted in areas where there is a reasonable likelihood of occupational exposure to blood or other potentially infectious.
  - a. True
  - b. False
  
11. Which of the following are potential routes of entry into the body for bloodborne pathogens?
  - a. Mucous membranes
  - b. Cuts on hand
  - c. Dermatitis
  - d. All of the above
  
12. The University of New Haven has an Exposure Control Plan that can be viewed on the on MyCharger, the University Portal.
  - a. True
  - b. False
  
13. Which of the following personal protective equipment is required when working with or around blood or other potentially infectious materials?
  - a. Gloves
  - b. Goggles
  - c. Gowns/Lab coats
  - d. All of the above
  
14. Contaminated sharps can be disposed of in the regular trash.
  - a. True
  - b. False
  
15. OSHA Standards relating to bloodborne pathogens are federal law; compliance is mandatory.
  - a. True
  - b. False

16. Which of the following are considered work practice controls to protect employees to the risk of exposure to bloodborne pathogens?
- a. Not eating or drinking within work area
  - b. Decontaminating Surfaces
  - c. Hand Washing
  - d. All of the above
17. Once a worker has been stuck with a sharp, we assume they have been exposed.
- a. True
  - b. False
18. Please indicate for Human Resources records if you would like to receive the Hepatitis B vaccination. If you choose to decline the Hepatitis B vaccine and have not been vaccinated previously, you also certify that you understand that you continue to be at risk of acquiring Hepatitis B, a serious disease. If, in the future you continue to have occupational exposure to blood or other potentially infectious materials while working at the University and want to be receive the Hepatitis B vaccine, you can receive the vaccination series at no charge.
- a. Accept
  - b. Decline
  - c. Already Vaccinated
